

## Visit from Japanese University Chancellors to Arborea Intellbird, to meet the Aracnoóptero.

A group of Chancellors from several different Japanese Universities visited the Arborea Intellbird firm to see, first hand, a flight demonstration of the Aracnoóptero Eol 6.

They were greeted by Carlos Bernabéu, the director of the company ARBOREA INTELLBIRD, who explained to them the development of R&D that they are carrying out from one of the most outstanding companies working in unmanned aerial vehicles (UAV) around the globe.

Throughout the visit, the Japanese delegation showed great interest in the latest advancements developed for the Aracnoóptero and the diverse array of applications for the UAV.
