

Iberdrola will carry out a Flight Demonstration of Aracnocóptero

It will take place Tuesday, April 8th, in the Sierra Dueña Wind Park

06.04.2014 | TRIBUNA

IBERDROLA, along with the Salamanca-based company Arbórea Intellbird, S.L, has prepared a flight demonstration of the Aracnocóptero Eol6 in the Sierra Dueña Wind Park, property of Iberdrola, for the 8th of April.

This foldable multi-rotor helicopter will inspect wind turbine blades in the wind park, capturing pertinent information for its maintenance.

Afterwards, there will be a visit to the Wind Park and the corresponding substation to get to know firsthand these important renewable energy facilities, which produce electricity equivalent to the annual consumption of 15,000 households.

IBERDROLA participates in this project through its support program for entrepreneurial projects.
